Log in page

Pedometer

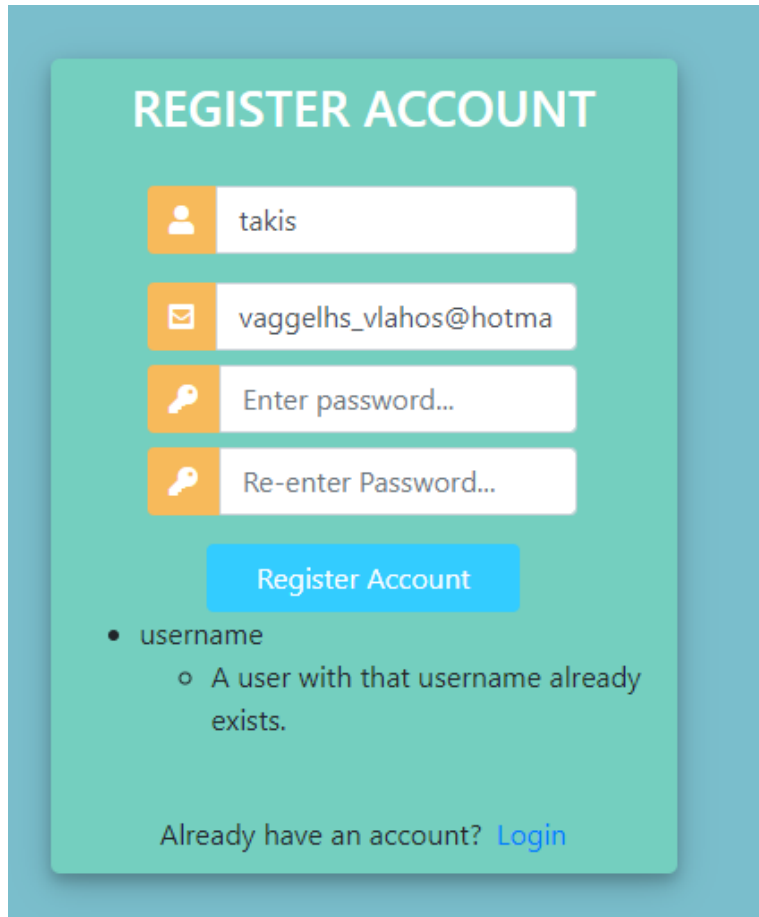

Login

Username OR password is incorrect

Don't have an account? [Sign Up](#)

- On this page the user logs in if they already have an account, or registers if they do not.
- At this point validation runs to check the submitted username and password against the user list in the database.

Register Page

A screenshot of a web registration form titled "REGISTER ACCOUNT". The form is set against a teal background. It contains four input fields, each with an orange icon on the left: a person icon for the username field (containing "takis"), an envelope icon for the email field (containing "vaggelhs_vlahos@hotmail"), a key icon for the password field (containing "Enter password..."), and another key icon for the re-enter password field (containing "Re-enter Password..."). Below these fields is a blue "Register Account" button. At the bottom left, there is a bullet point under the heading "username" with a sub-point stating "A user with that username already exists." At the bottom right, there is a link that says "Already have an account? Login".

REGISTER ACCOUNT

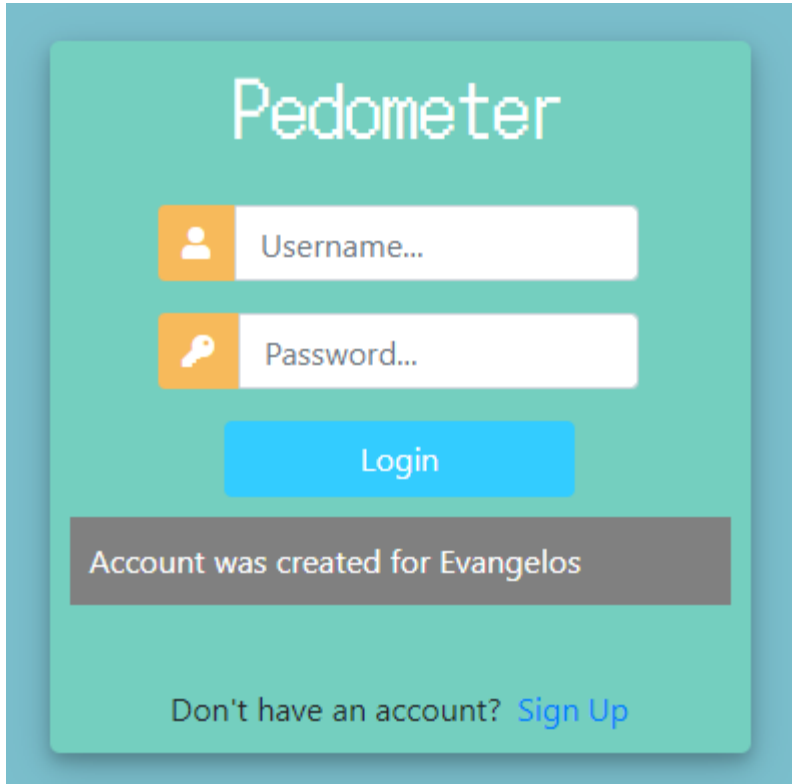

Register Account

- username
 - A user with that username already exists.

Already have an account? [Login](#)

- On the register page the user enters their personal information. If the form is valid and the chosen username and password are accepted, the user is redirected to the login page.

Log in page

A login page for an application named "Pedometer". The page has a teal background. At the top, the word "Pedometer" is written in white. Below it are two input fields: "Username..." with a person icon and "Password..." with a key icon. A blue "Login" button is below the password field. A dark grey message box at the bottom left says "Account was created for Evangelos". At the very bottom, it says "Don't have an account? [Sign Up](#)".

Login

Account was created for Evangelos

Don't have an account? [Sign Up](#)

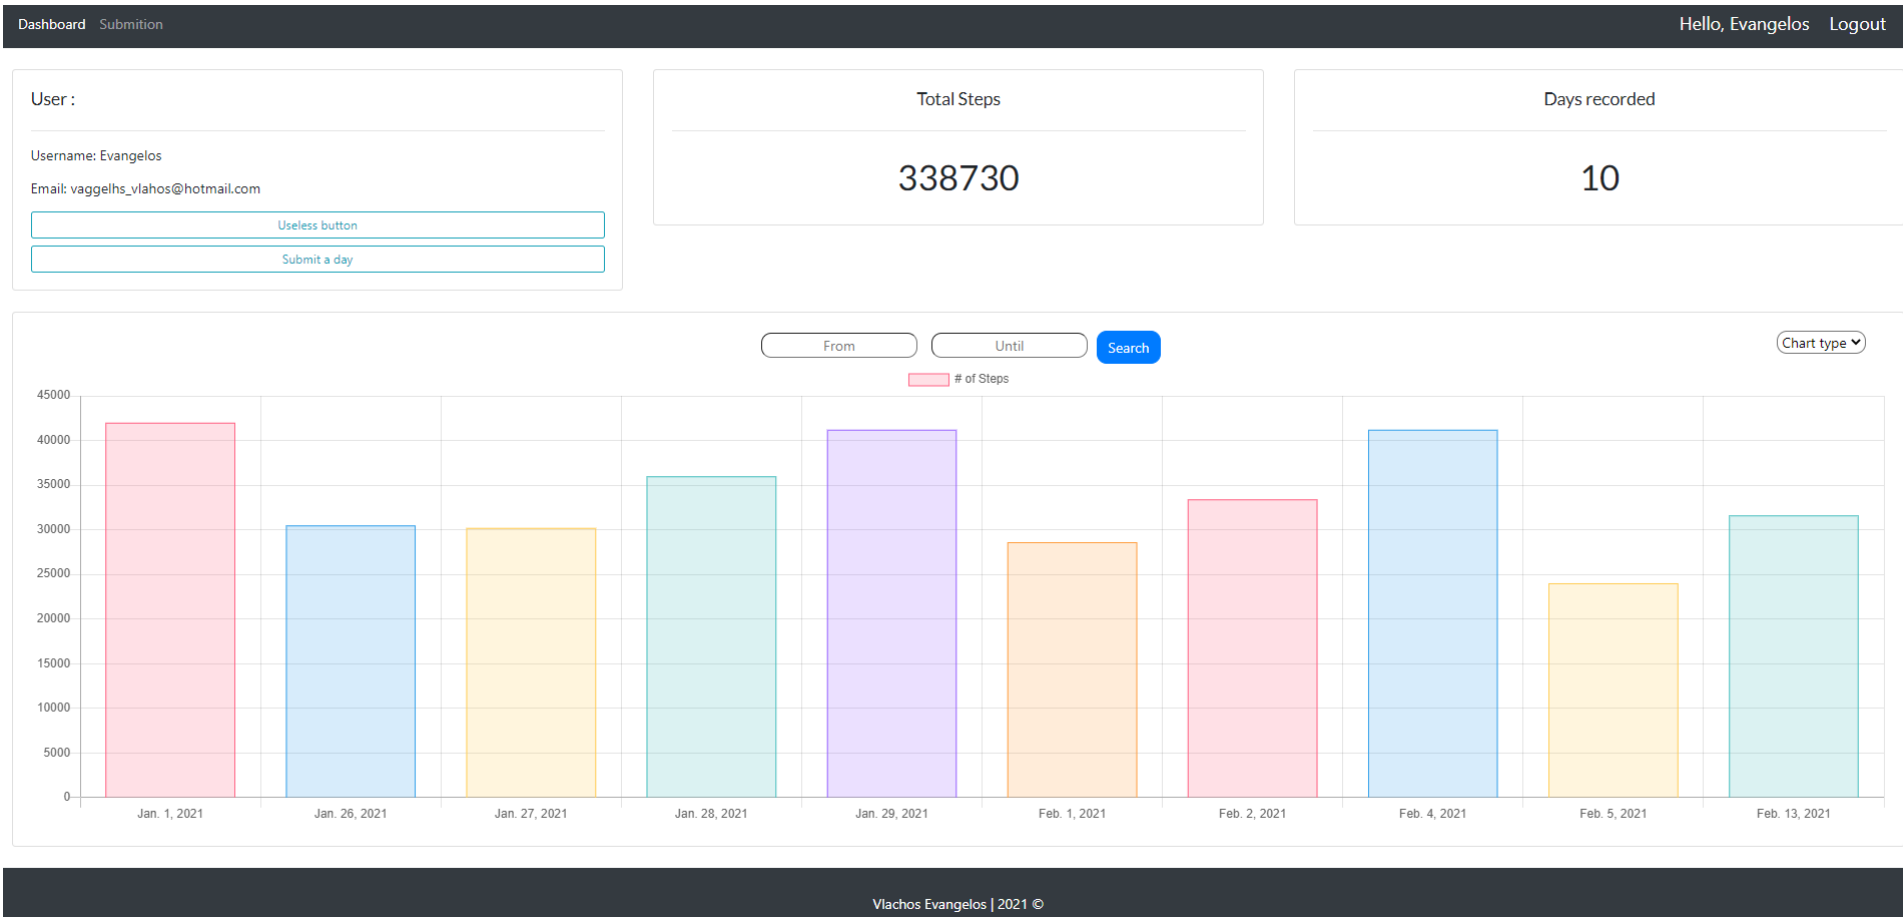

- A message confirms that the account has been created, and then we wait for the user to enter their credentials.

Dashboard

- This is the main dashboard the user lands on after logging in. A navbar lets them switch between the dashboard and the create-record page, and the top section shows information about the user.
- In the middle the main content
- And on the bottom a simple footer.

Dashboard

- After a few manual insertions, the chart already shows the steps recorded over the past days.
- The user's information updates dynamically from the database, and so does the chart data.

Submitting Day's Steps

Adding steps to day :

Steps counter:

Day:

Submit

Adding steps to day :

- Day steps with this User and Day already exists.

Steps counter:

- Ensure this value is less than or equal to 50000.

50001

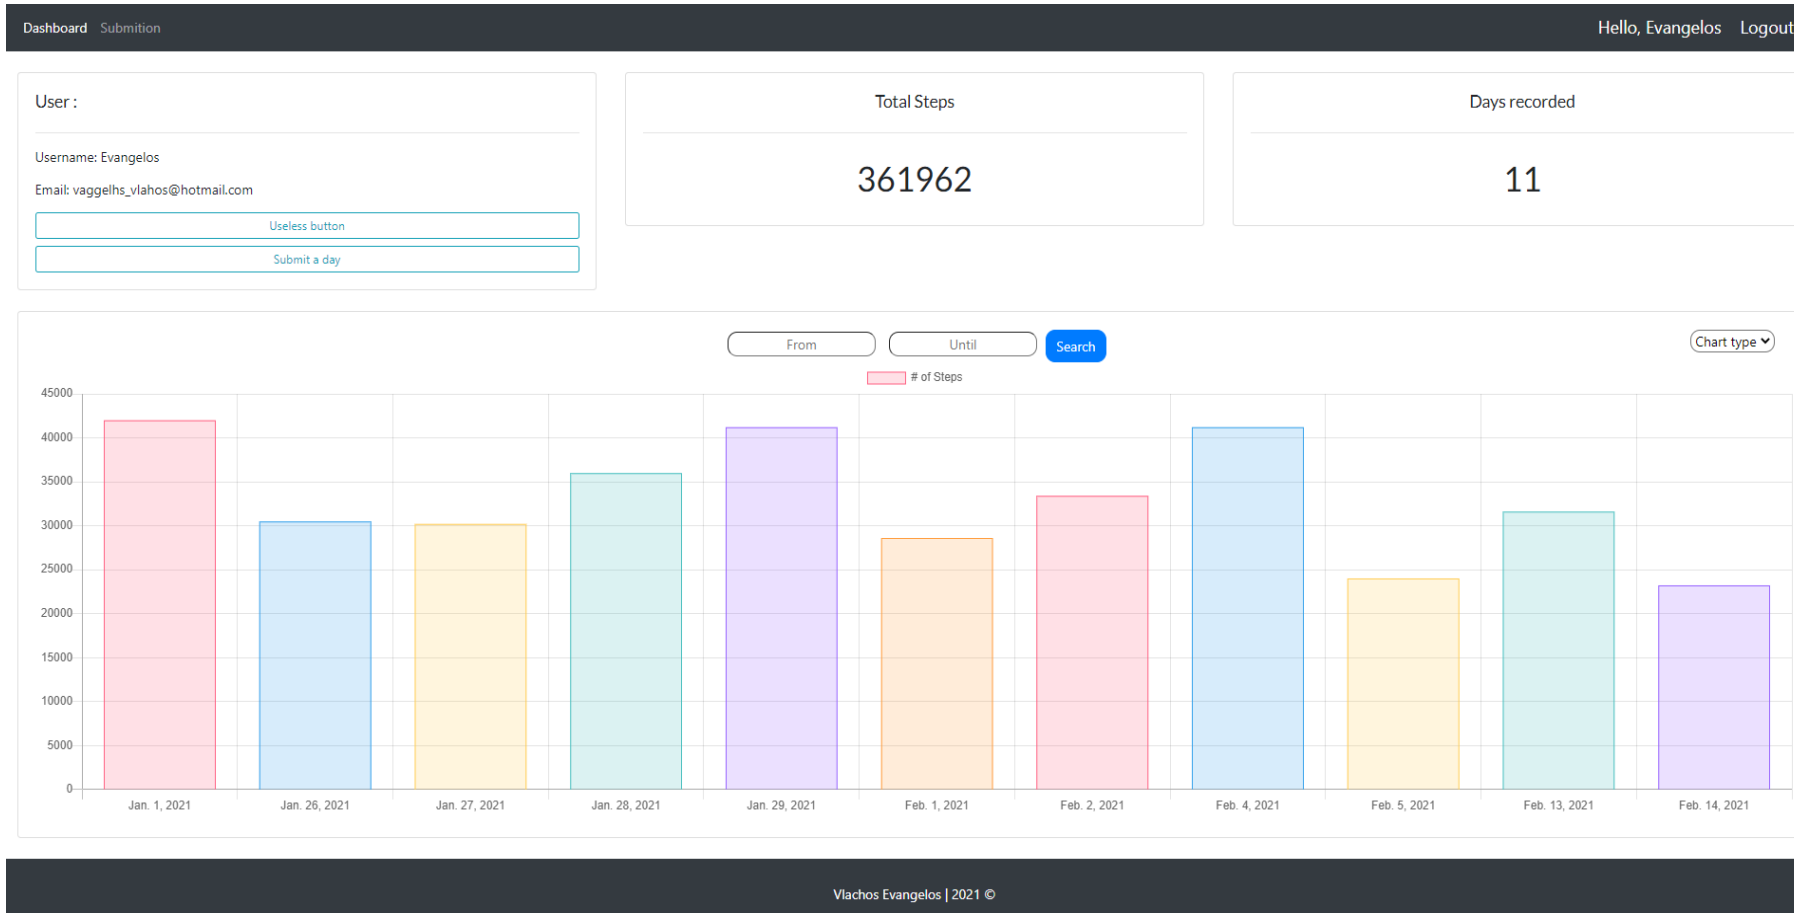

Day:

2021-01-01

Submit

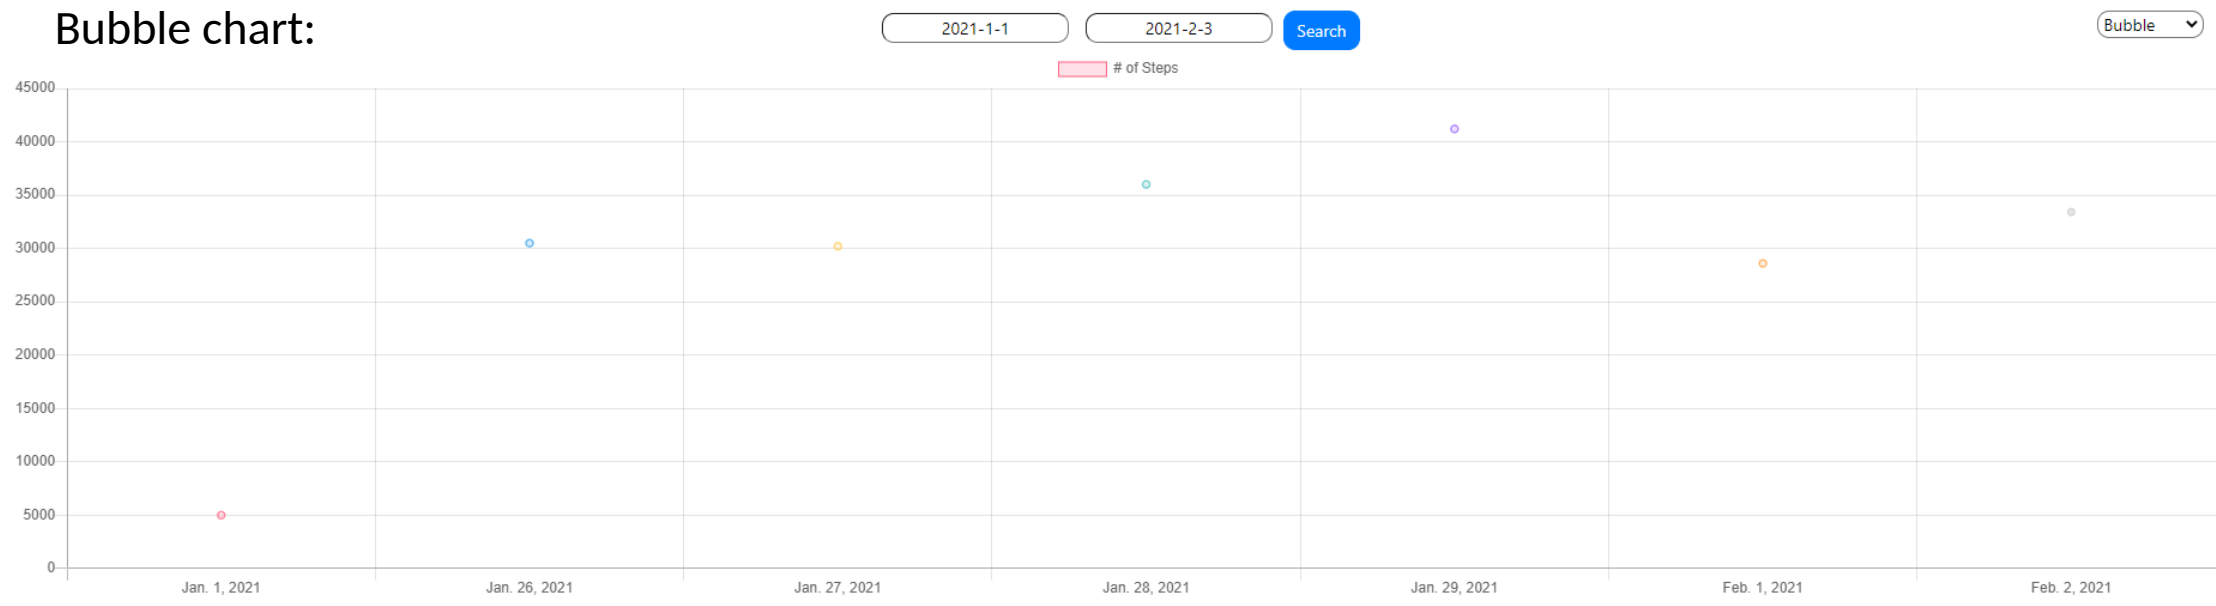

- At the end of a day the user can add their step count.
- The user cannot add steps twice for the same day, and the step count must be between 0 and 50,000.

After Submission

- The user has successfully added another day of steps.
- They can now use the chart-type selector to change how the data is displayed.

Bubble chart:

Email: vaggelhs_vlahos@hotmail.com

Filters

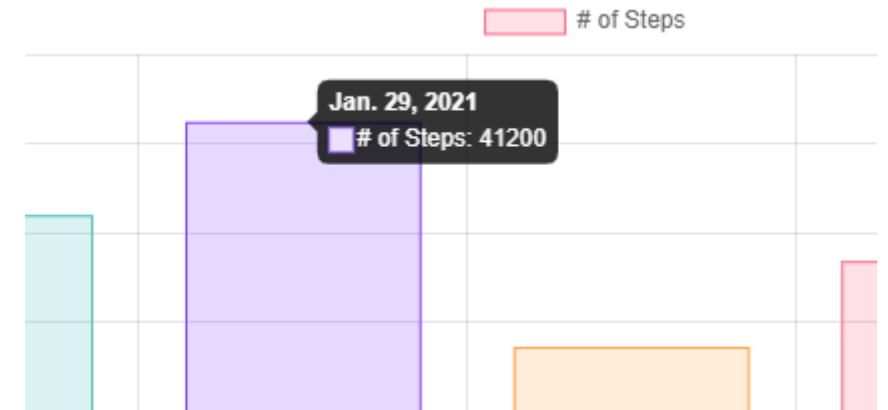

- Finally, the user can filter by a specific time period to view the statistics for that range. The charts refresh automatically, just like when the chart type is changed.

2021-1-1 2021-2-4 Search

of Steps

The image shows a user interface for filtering data. It features two light blue rounded rectangular input fields. The first field contains the text '2021-1-1' and the second field contains '2021-2-4'. To the right of these fields is a blue rounded rectangular button with the text 'Search'. Below the input fields, there is a small pink rectangular legend box with the text '# of Steps'.
